SUMMARY

Frontend Developer (React.js) focused on building high-performance, scalable web applications. Skilled in creating responsive, user-friendly interfaces using modern React and JavaScript. Strong problem-solving abilities with experience in collaborative, fast-paced environments. Passionate about clean code, performance optimization, and exceptional user experiences.

TECHNICAL SKILLS

HTML5	Tailwind CSS	Git
CSS3	Bootstrap	GitHub
JavaScript	Responsive Design	User Testing Tools
React.js	REST APIs	

PROFESSIONAL EXPERIENCE

Frontend Developer (React Expert),Skillware4u

Jan 2025-Present

- Led the design and development of large-scale React.js applications, improving performance, scalability, and user engagement by 15%.
- Architected reusable component systems and optimized state management, reducing development effort and long-term maintenance costs by 10%.
- Drove frontend performance optimization, code reviews, and best practices adoption, resulting in a 20% reduction in UI bugs and production issues.

Machine Learning Engineer, Skillware4u

Aug 2024 -(6 Months)

- Designed and optimized machine learning pipelines, improving model performance and inference efficiency by 12%.
- Coordinated data preprocessing, testing, and validation, ensuring robust and accurate predictions.

EDUCATION

COMSATS University Islamabad

Jun 2022- Jun 2026

Bachelor of Science in Computer Science

Focused on Software Development, Web Technologies, and Machine Learning, gaining hands-on experience in building scalable applications, developing interactive user interfaces, and implementing AI-driven solutions.

“Advancements in Machine Learning and AI Applications in Real-World Systems”, exploring innovative techniques to optimize model performance, automate processes, and solve complex computational problems.

ADDITIONAL INFORMATION

- Languages:** English, Urdu
- Certifications:**Practical expertise in React.js, JavaScript, and Frontend Development through professional projects at Skillware4u.
Led onboarding and project initiatives, contributing to improved workflows and team performance.

PROJECTS

FYP – Web-Based Brain Tumor Classification

- Technologies: Python, TensorFlow/Keras, OpenCV, Flask, HTML/CSS
- Built a machine learning web app to classify brain tumors from MRI images using CNN and real-time prediction.

Counsel System

- Technologies: React.js, Node.js, Express.js, MongoDB
- Developed an online counseling platform with authentication, appointment booking, and admin dashboard.

Intra Fitout Portfolio

- Technologies: HTML, CSS, JavaScript
- Designed a responsive business portfolio website showcasing company projects and services.

Personal Portfolio Website

- Technologies: React.js, Tailwind CSS / Bootstrap
- Created a responsive personal portfolio to display projects, skills, and contact details.

Skillware4u Website

- Technologies: MERN Stack / HTML, CSS, JavaScript
- Developed an educational website for online courses with structured content and user-friendly interface.
